

BOYA SAIKIRAN

Aspiring Software Engineer | AI & Machine Learning
PH:6303093649 | Email : boyasaikiran37@gmail.com | [Github](#) | [Linkedin](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with internship experience in Computer Vision, Web Development, and Cybersecurity. Proficient in Python, Java, JavaScript, SQL, React, PyTorch, and TensorFlow. Passionate about building scalable software solutions and solving real-world engineering problems.

EDUCATION

Karunya Institute of Technology and Sciences - Coimbatore, Tamil Nadu B.Tech – Computer Science and Engineering (AIML) CGPA: 6.67/10	May 2027
Sri Chaitanya Junior College -Intermediate (MPC) Percentage: 82%	March 2023
St. John's English Medium High School - Secondary School Certificate (SSC) Percentage: 81%	May 2021

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript
AI & Machine Learning: Machine Learning, Deep Learning, Computer Vision, PyTorch, TensorFlow, OpenCV
Web Development: HTML, CSS, React.js, Node.js, Express.js, Streamlit
Databases: MySQL, MongoDB
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Computer Vision Intern - Karunya Innovation and Design Studio, Coimbatore - Developed and evaluated Computer Vision models using Python, PyTorch, and OpenCV for image analysis tasks. - Trained and evaluated deep learning models on the University-1652 dataset, improving cross-view image retrieval performance.	May 2025 – Jun 2025
Web Development Trainee - KarunyaHacks, Coimbatore - Developed responsive full-stack web applications using React.js, Node.js, Express.js, and MongoDB. - Designed REST APIs and integrated MongoDB for user authentication and data management.	Nov 2024 – Aug 2025
Cybersecurity Intern - Cisco Networking Academy (AICTE Virtual Internship) - Completed hands-on cybersecurity training covering network security, vulnerability assessment, and secure networking. - Performed practical virtual labs focused on cybersecurity fundamentals and threat mitigation.	May 2024 – Jul 2024

PROJECTS

Cross-View Image Retrieval using Swin Transformer (Python, PyTorch, OpenCV, FAISS) - Developed a deep learning-based cross-view image retrieval system using the University-1652 dataset. - Implemented FAISS for real-time similarity search and Evaluated the model on the University-1652 dataset, achieving 100% Top-5 retrieval accuracy with Top-1 accuracy up to 42.9%.
OTP Verification System (React.js, Node.js, Express.js, MongoDB) - Built a secure OTP-based authentication system with email verification. - Integrated backend APIs and MongoDB for user registration and login.
AI vs Human Image Classifier (Python, TensorFlow, Streamlit) - Developed a deep learning model to classify AI-generated and human-created images. - Built a Streamlit interface for image upload and real-time prediction.

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AI-900) | IBM Artificial Intelligence Practitioner | Cisco Cybersecurity Essentials | Google – Introduction to Generative AI | Cisco AICTE Virtual Internship | Simplilearn – Master AI for Web App Development

HACKATHONS & ACHIEVEMENTS

- IBM Z Datathon 2024 (Global Datathon) | G-K Hacks 2025 (Google Cloud Security)
