

BOYA SAIKIRAN

Coimbatore, TN | +91 6303093649 | Boyasaikiran37@gmail.com | LinkedIn Profile | GitHub Portfolio

SUMMARY

Final-year B.Tech student in Computer Science (AI & ML) at Karunya University (CGPA 7.0/10). Strong foundation in data analysis, automation scripting, and AI-powered tooling, with hands-on experience writing technical documentation and presenting findings to non-technical audiences. Eager to apply analytical thinking, content creation, and AI automation skills in a fast-paced digital marketing environment. Quick learner who has delivered results across concurrent internships and self-initiated projects under tight deadlines — with a strong interest in B2B outreach, lead generation, and performance-driven marketing.

EXPERIENCE

Web Development Trainee

May 2025 – Present

Karunya Innovation & Design Studio, Coimbatore

- Shipped 3 responsive full-stack web applications; collaborated in an Agile team of 4 using Git for branch management, code review, and bi-weekly sprint releases.
- Implemented email delivery via Nodemailer (SMTP) with OTP rate-limiting (5 requests/hour) — practical knowledge of email infrastructure and deliverability.
- Applied structured thinking to messaging flows and user communication (OTP/email systems), building understanding of user response behavior and conversion triggers.
- Optimised page load time by 35% through code-splitting and lazy loading, demonstrating data-driven, results-oriented thinking.

Computer Vision Intern

Jan 2025 – May 2025

Karunya Innovation & Design Studio, Coimbatore

- Built and documented end-to-end AI pipelines; wrote clear technical reports and presented results to faculty researchers and peer teams.
- Reduced dataset preparation time by ~40% through automated Python scripts — identifying inefficiencies and building faster, repeatable workflows.
- Applied iterative optimisation techniques to cut processing latency by 28%, demonstrating a performance-measurement and continuous-improvement mindset.

Cybersecurity Virtual Intern

May 2024 – Jul 2024

Cisco AICTE Virtual Internship (Remote)

- Completed 120+ hours of structured self-directed learning — demonstrating the discipline and independence required for remote, project-based work.
- Identified and documented 15+ vulnerabilities with written remediation proposals, practising structured reporting and professional communication.

SELECTED PROJECTS

Email Outreach Campaign | Self-Initiated

2025

- Designed a 3-step cold email sequence targeting B2B SaaS companies; defined ICP (CTO/CEO, 20-200 employees) and built a segmentation strategy by company size and tech stack fit.
- Applied personalisation and value-based messaging principles to improve response potential; simulated campaign performance metrics and iterated messaging based on expected open/reply behaviour.
- Demonstrates end-to-end understanding of B2B outreach: audience definition, copywriting, sequencing, and performance iteration.

Crop Recommendation System | Python, scikit-learn, XGBoost, Streamlit

2024

- Built a data-driven recommendation tool and presented it live to 30+ agriculture students at a college workshop — translating complex data into clear, actionable insights for a non-technical audience.
- Engineered features from soil and climate datasets; trained a stacked ensemble achieving 95.8% accuracy on a 2,200-sample test set. Deployed a Streamlit interface for real-time use.

OTP Verification System | React, Node.js, Express, Nodemailer, JWT

2025

- Designed a full-stack authentication flow with time-limited 6-digit OTPs via SMTP, rate-limited to prevent abuse. Tested against 200 simulated sessions — zero false authentications recorded.

Leaf Species Classifier | Python, TensorFlow, EfficientNet-B3 2024

- Fine-tuned EfficientNet-B3 on 8,500 leaf images (30 species) with transfer learning; achieved 91.4% validation accuracy. Automated preprocessing pipeline cut per-image prep time by 75%.

SKILLS

Marketing-Relevant:	B2B Outreach & Lead Generation, Email Sequencing & Copywriting, Audience Segmentation & ICP Definition, AI & Automation Tools, Content Writing & Technical Documentation, Data Analysis & Reporting, Google Docs / Sheets
Programming:	Python, JavaScript, Java, C
Frontend:	React.js, HTML5, CSS3, Responsive Design
Backend:	Node.js, Express.js, REST API Design
Databases:	MySQL, MongoDB
ML / AI:	PyTorch, TensorFlow, scikit-learn, OpenCV, XGBoost
Tools:	Git, GitHub, Streamlit, VS Code, Jupyter Notebook, Linux CLI
Languages:	English (Professional), Telugu (Native), Tamil (Conversational)

EDUCATION

B.Tech in Computer Science (AI & ML) — Karunya University, Coimbatore <i>CGPA: 7.0 / 10.0 Relevant: DSA, Machine Learning, Deep Learning, Computer Vision, Database Systems, Networks</i>	Aug 2024 – May 2027
Intermediate (MPC) — Sri Chaithanya Jr College, Kurnool, AP 83%	Mar 2021 – Mar 2023

CERTIFICATIONS & ACHIEVEMENTS

- IBM Artificial Intelligence Practitioner Certificate V2 — IBM | 2024
- Introduction to Generative AI — Google Cloud | 2024
- Cybersecurity Essentials — Cisco | Jul 2024
- IBM Z Datathon 2024 — Built and presented an ML solution under a 24-hour constraint in a global AI/data science competition.
