

BOYA SAIKIRAN

Boyasaikiran37@gmail.com | +91 6303093649 | LinkedIn: BoyaSaikiran

CAREER OBJECTIVE

Dedicated to utilizing my skills to conceive valuable initiatives for organization. Committed to delivering high-quality solutions and continuously pursuing knowledge and innovation to be an invaluable asset.

EDUCATION

KARUNYA UNIVERSITY

B-tech in Computer Science (AIML)
2024-2027 | Coimbatore, TN
CGPA: 7.0 / 10.0

SRI CHAITHANYA JR COLLEGE

Intermediate in MPC
Mar 2023 | Kurnool, AP
Percentage: 8.28

ST. JOHNSSCHOOL

May 2021 | Alur, AP
GPA: 8.1/10.0

SKILLS

TOOLS AND TECHNOLOGIES:

Programming Languages: Python, Java, C.

- Front-End Development (HTML, CSS, JavaScript, React,)
- Back-End Development (Node.js, Express.js)
- Database Management (MySQL, MongoDB)
- Version Control Systems (Git, GitHub)
- Data Preprocessing, Model Training & Testing, Computer Vision, NLP
- Problem Solving and Debugging

Languages

- English
- Telugu
- Kannada

PERSONAL TRAITS

- Collaborative
- Adaptability
- Curiosity

CERTIFICATIONS

- IBM Artificial Intelligence Practitioner Certificate V2
- Introduction to Generative AI by Google
- Cybersecurity Essentials Issued by Cisco

EXPERIENCE

Summer Internship Computer Vision Experience – Karunya Innovation & Design Studio (2025)

- Worked on image processing and deep learning techniques for real-time vision applications.
- Developed expertise in model training, feature extraction, and evaluation using OpenCV and PyTorch/TensorFlow.
- Contributed to solving real-world problems through image classification, object detection, and segmentation tasks.
- Designed and tested computer vision pipelines by preprocessing datasets, applying augmentation, and optimizing model accuracy.

Karunya Innovation and Design Studio

Web Development Trainee

May 2025 – Present
Coimbatore, India

During this Period: Gaining hands-on experience in web development by designing and implementing responsive, user-centric web applications and real-time projects.

Hackathon participation:

IBM Z Datathon 2024 - A GLOBAL DATATHON EVENT

Internship Experience – Cisco AICTE Virtual Internship Program (May - July 2024)

- Gained practical experience in cybersecurity concepts, tools, and best practices through hands-on training.
- Developed expertise in network security, risk assessment, and threat mitigation strategies.
- Worked on simulated real-world scenarios to identify vulnerabilities and implement security protocols

PROJECTS

- **Cross-View Image Retrieval System using Swin Transformer :**

Built a retrieval system to match drone, satellite, and ground images using deep-learning feature embedding. Implemented Swin Transformer backbone and FAISS similarity search for efficient retrieval. Evaluated performance using Top-K accuracy and mAP metrics on University-1652 dataset.

- **OTP Verification System:**

The OTP Verification System is a secure user authentication solution designed to verify a user's identity via a One-Time Password (OTP) sent to their registered email address. Built using React.js for the frontend and Node.js with Express on the backend, the system ensures secure and user-friendly registration and login processes.

- **Leaf Vein / Leaf Image Classification using Deep Learning:**

Developed a deep learning-based system for identifying plant species by analyzing leaf vein patterns and shape features. Collected and preprocessed leaf datasets, applied augmentation techniques, and extracted key features. Built and trained CNN/EfficientNet models to classify leaf categories with high accuracy. Evaluated model performance using metrics such as accuracy, precision, recall, and confusion matrix. Implemented preprocessing pipeline using Python, OpenCV, and TensorFlow/PyTorch.

- **Crop Recommendation System:**

Designed an ML-based system that recommends optimized crops based on soil nutrients, weather, and location parameters. Used Random Forest and XGBoost algorithms to predict yield and fertilizer suggestions. Delivered a web interface for user interaction using Streamlit.
